TITLES AND KEYWORDS OF PAPERS

A
absorption 435
adsorption 346
AGAPE a generalized approach to phase equilibria 471
agitated gas-liquid mixtures 578
agitated vessels 377
air pumping 385
alcohol 501
anchor 377
Application of pinch technology to retrofit energy integration of an entire oil refinery, The, Fraser, D.M. and Gillespie, N.E. 395
Application of population balance techniques to the modelling of the cell cycle, The, Faraday, D.B.F. and Kirkby, N. 174
aqueous drives 313
artificial intelligence 110
atmospheric crude towers 479
axial dispersion 333
azeotropes 439

B
barite suspension 55
Bayesian 620
bed scale parameter 610
Benefits of process intensification for Caro's acid production, The, Whiting, M.J.L. 195
boundary layers 604
boundary layer transport 596
bubble formation 161
bubble size distribution 153
Bubble size in the impeller region of a Rushton turbine, Barigou, M. and Greaves, M. 153

C
calcium sulphite 291
capacity 25, 516
capillary probe 153
capital cost 118
carbon dioxide 346
cascade control 149
catalytic 239
catalytic distillation columns 459
catalytic distillation processes 459, 465
chamber effect on bubble formation 161
Chemical engineering research in the Netherlands, Krishna, R., Wesselingh, J.A. and van Swaaij, W.P.M. 166
clay suspension 55
coal gasification 211
Collection of dust particles by falling water droplets, The, Pulley, R.A. and Walters, J.K. 354
column 142
Comments on 'Structural analysis and synthesis of feasible control systems — theory and applications', Lin, X. and Newell, R.B. 427
Comparison of packing types in a water deaeration column under vertical, tilt and motion conditions, Baker, S.A., Tanner, R.K. and Waldie, B. 509
competing reactions 282
computational fluid dynamics 489
computer-aided design 304
computer-aided process design 110
computer simulaton 78
connectivity 63
controllability 427
copper coil 558
costs 3, 516
countercurrent mass transfer 459
cracking 239
crossflow microfiltration 527
Crossflow microfiltration incorporating rotational fluid flow, Holdich, R.G. and Zhang, G.M. 527
crude oil 547, 627
cyclohexanone 421

D
dehumidification 572
desalination 304
design 296, 448
design model 118
Design and optimisation of fully thermally coupled distillation columns, The, Triantafyllou, C. and Smith, R. 118
desorption of oxygen 578
Development of an expert system for process synthesis, Crowe, C., Douglas, P.L., Glasgow, J. and Mallick, S.K. 110
direct smelting 585
distillation 142, 435, 439, 448, 479, 489, 501
Distillation and absorption technology: current market and new developments, Darton, R.C. 435
distillation column 118
distillation processes 465
Distortion of measured temperature profiles in fixed-bed reactors, The, Mongkhonsi, T., Lopez-Isunza, H.F. and Kershenbaum, L.S. 255
D-K equation 55
drilling 48
drilling fluids 55
dust collection 354
dynamic 620
Dynamic modelling of mass transfer in agitated gas-liquid mixtures, Love, J. and Tan, Y.L. 578
dynamic simulation 99

E
economies 516
Effect of chamber volume and diameter on bubble formation at plate orifices, Antoniadis, D., Mantzavinos, D. and Stamatoudis, M. 161
effective heat transport coefficient 610
effectiveness-NTU 572
Effectiveness-NTU method for design of packed bed liquid desiccant dehumidifiers, Sadasivam, M. and Balakrishnan, A.R. 572
efficiencies 142
Efficient and accurate computation of thermodynamic properties for design of separation processes, Gani, R. and Fredenslund, Aa. 439
emissions 3

energy consumption 118
energy efficiency 3
energy integration 395
Energy integration of mechanical heat pumps with process fluid as working fluid, Krajnc, M. and Glavic, P. 407
equipment 296
Estimation of heat transport parameters from the dynamic response of fixed beds, Gunn D.J. and Misbah, M.M.A. 620
ethane 346
Evaluating scale economies in process plants, Brennan, D.J. 516
expansion 516
Experimental studies on gas-dynamics of venting explosions, Wu, Y, and Swithenbamk, J. 200
expert systems 110
extraction 323
extractor 323

F
fixed-bed reactors 255
fixed beds 252, 620
floating production systems 17
flow measurements 32
Flow patterns and temperature profiles on a 2.44 m diameter sieve tray, Porter, K.E., Yu, K.T., Chambers, S. and Zhang, M.Q. 489
flow visualization 313, 385
Flow visualization in a spray dryer fitted with a vaned-wheel atomizer, Langrish, T.A.G., Keey, R.B. and Hutchinson, C.A. 385
fluidization 246
fluidized bed gasification 211
fluidized beds 239, 211
formation of bubbles 161
Formation of natural gas hydrates in water-based drilling fluids, The, Ouar, H., Cha, S.B., Wildeman, T.R. and Sloan, E.D. 48
forward mixing 333
fouling 527, 547
Fouling of crude oil preheat exchangers, Crittenden, B.D., Kolaczkowski, S.T. and Downey, I.L. 547

G
gas 19, 48
gas-condensate pipelines 38
gas hydrates 43
gas jet 585
gas-liquid dispersion 153
gas-liquid-solid reactor 465
Gas phase mass transfer on top-blown liquid surfaces, Dai, X. and Warner, N.A. 585
gas pressure drop 252
gas-solid non-catalytic reaction 265
gate agitator 377
Generalized approach to phase equilibria: recent developments in the prediction of vapour-liquid equilibria from a generalized London principle, A, Homer, J., Jenkins, J.D., Porter, K.E. and Kakhu, A.I. 471
geometry 565

H
heat capacity 620
heat exchanger design 133
heat exchanger network 407
heat exchanger network synthesis 395
heat exchangers 118
heat and mass diffusion 596
heat and mass exchangers 572
heat pump 407
heat transfer 255, 558, 565, 620
heat transfer coefficients 133
Heat transfer enhancements in round tubes using three different tube inserts: non-Newtonian liquids, Oliver, D.R. and Shoji, Y. 558
heterogeneous kinetic models 276
heterogeneous kinetics 291
heterogeneous reaction system 421
heterogenous azeotropic distillation 99
highly viscous fluid mixing 377
hydrate control 38
hydrate formation conditions 43
Hydrate formation and control in long distance submarine pipelines, Lingelem, M.N. and Majeed, A.I. 38
hydrate plugs 38
hydrates 48
hydrodynamic regimes 246
Hydrodynamics in vessels stirred with anchors and gate agitators, Abid, M., Xuereb, C. and Bertrand, J. 377
hydroxyl ammonium 421

I
Incipient equilibrium hydrate formation conditions in aqueous polymer solution, Englezos, P. 43
inertial collection 354
inhibition 48
innovative research 166
intensification 516

K
kinematic viscosity 627
kinetic parameter 421
Kinetics of oxidation of calcium sulphite slurries in aerated stirred tank reactors, Deplancq, E., Casti, P. and Vanderschuren, J. 291
knowledge based system 304

L
laminar boundary layer flow 604
laminar flow 596
laminar flow range 377
liquid desiccant 572
liquid distributor 509
Liquid-liquid extraction column modelling: is the forward mixing influence necessary? Korchinsky, W.J. 333
liquid-liquid extraction columns 333
Liquid-liquid extraction using vortex rings in a batch cell, Baird, M.H.I., Rama Rao, N.V. and Latto, B. 323
load disturbances 149
London potential 471

M
marine motion effects 17
mass transfer 323, 509, 578, 585
mass transfer in catalyst bed 459
mass transfer characteristics 459
mass transfer coefficient 459
mathematical modelling 211
Mathematical modelling of fluidized bed coal gasifiers, Gururajan, V.S., Agarwal, P.K. and Agnew, J.B. 211
membrane 501
Membrane alcohol separation processes — integrated pervaporation and fractional distillation, Guerreri, G. 501
membrane processes 71
mercury porosimetry 63
Mercury porosimetry as a probe of pore connectivity, Portsmouth, R.L. and Gladden, L.F. 63
Method for visualizing the movement of an aqueous drive in a granular bed containing oil, A, Alsharbati, N.M.W., Rosseland, E. and Edge, R.M. 313
methyl tertiary butyl ether 465
Mitigation of small-scale hydrocarbon-air explosions by water sprays, The, Jones, A. and Thomas, G.O. 197
mixing 282
modelling 239, 578
Modelling of flow and heat transfer in fluidized catalytic cracking, riser-type reactors, Theologos, K.N. and Markatos, N.C. 239
Modelling of a series of rinse baths considering rinsing efficiency, White, D.A. 537
Modified penetration theory and its relation to boundary layer transport, A, Trinh Khanh Tuoc and Keey, R.B. 596
molecular graphics 78
motion 509
moving beds 252
moving boundary 276

mud 48
multicomponent 346
Multicomponent pressure swing adsorption for non-isothermal, non equilibrium conditions, Mutasim, Z.Z. and Bowen, J.H. 346
multiphase metering 32
Multiphase metering, Dykesteen, E. 32
multiphase transport 32

N
new developments 435
new technology 435
non-catalytic gas-solid reactions 276
nonequilibrium stage model 465
non-Newtonian liquids 558, 604
numerical simulation 385

O
object oriented programming 304
oil 3, 9
oil recovery 313
oil refinery 395
oil/water separation 17
onshore 3
On the weak coupling between geometry and heat transfer in heat exchanger optimization, Ramananda Rao, K., Shrinivasa, U. and Srinivasan, J. 565
optimization 99, 118, 407, 537, 565
Optimum heat exchanger design, Jegede, F.O. and Polley, G.T. 133
orifice bubble formation 161
oxidation 291
oximation 421
Oximation of cyclohexanone in heterogeneous liquid-liquid reaction system, Asai, A., Nakamura, H., Shimizu, H. and Tanabe, M. 421

P
packed bed 572
packed column 509
partial segregation 282
Partial segregation in stirred batch reactors: effect of scale-up on the yield of a pair of competing reactions, Wang, Y.-D. and Mann, R. 282
particle technology 55
particulate beds 252
penetration theory 596
performance 25
pervaporation 501
petroleum fractions 627
phase equilibria 471
phase equilibrium 43
pinch technology 395, 407
pipelines 38
pollution control 537
polymer solutions 43
pore structure 63
prediction 471
Prediction methods for distillation point efficiencies on sieve trays with small holes, Dribika, M.M. and Biddulph, M. 142
preheat exchangers 547
pressure driven membrane processes 71
pressure drop 71
Pressure drop in countercurrent gas flow through moving particulate beds, Paterson, W.R., Crawshaw, J.P., Hart, G., Parker, S.R., Scott, D.M. and Young, J.P. 252
pressure drops 133
pressure fluctuations 246
pressure swing 346
primary separators 17
process 501
process engineering 110
process flowsheeting 110
process modelling 585
process synthesis 110
pump-around zones 479

R
radial inlet 25
random network 63
rate-based model 465
rate-based simulator 479
Ratefrac 479
rate vs equilibrium 439
reaction engineering 255
reactive distillation 448
Reactive distillation by design, Doherty, M.F. and Buzad, G. 448
reactor 239
Reactor design for sonochemical engineering, Martin, P.D. and Ward, L.D. 296
reactors 296
Research School 166
Response of an oil/water containing vessel to imposed motion — theoretical and experimental modelling, Waldie, B. and White, G. 17
Response to Comments on 'Structural analysis and synthesis of feasible control systems', Georgiou, A. and Floudas, C.A. 430
retrofit 395
reverse osmosis 304
Rheological properties of barite-loaded drilling fluids, Briscoe, B.J., Luckham, P.F. and Ren, S.R. 55
rheology 55
Rheology of biological suspensions in relation to dewatering in a continuous scroll decanter centrifuge, The, Rumpus, J. and Hoare, M. 177
rinsing 537
Role of secondary integral action in cascade control, Krishnaswamy, P.R. and Rangaiah, G.P. 149
rotational flow 527
Rushton turbine stream 153

S
satellite fields 32
satellite production 25
scale 516
scale-up 282, 296
sea water deaerator 509
secondary integral action 149
Selection of solvents for liquid-liquid extraction, Meniai, A.-H. and Newsham, D.M.T. 78
Selective catalytic reduction of NOx, Price, H.J. 192
semi-batch 282
separation 9, 142, 501
Shaftwork targeting for low temperature plants, Linnhoff, B. and Dhole, V.R. 180
sharp interface 276
shell and tube heat exchangers 133, 565
shrinking core 276
Shrinking core model for non-catalytic, gas-solid reactions with arbitrary order with respect to the gaseous reactant and general boundary conditions, The, Villa, L.T., Quiroga, O.D. and Morales, G.V. 276
sieve trays 489
simulation 239, 439, 465, 479
Simulation and analysis of particle breakage phenomena, Calabrese, R.V., Wang, M.H., Zhang, N. and Gentry, J.W. 189
Simulation of atmospheric crude towers including packed bed pump-around zones using a rate-based simulator, McNulty, K.J. and Chatterjee, S.G. 479
simulation strategy 99
single pellets 265
slugcatcher 25
slurries 291
solvent design 78
solvent extraction 78
solvent selection 78
sonochemistry 296
spray dryer 385
statistical character 610
Statistical character of bed-scale effective heat transport coefficients for packed beds, The, Borkink, J.G.H., Van der Watering, C.G. and Westerterp, K.R. 610
Steady state and dynamic simulaiton of complex chemical processes, Perregaard, J., Pedersen, B.S. and Gani, R. 99

steady state simulation 99
stirred reactors 282,291
stirred tank 153
structural controllability 427
structurally functional controllability 427
structural synthesis 427
structural system 427
Study on catalytic distillation processes Part I: mass transfer characteristics in catalyst bed within the columns, Zheng Yuxiang and Xu Xien 459
Study on catalytic distillation processes Part II: simulation of catalytic distillation processes — quasi homogeneous and rate-based model, Zheng Yuxiang and Xu Xien 465
submarine pipelines 38
subsea 9
synthesis 296
Synthesis of a reverse-osmosis desalination plant: an object-oriented approach, Papafotiou, K., Assimacopoulos, D. and Marinos-Kouris, D. 304

T
tangential inlet 25
temperature distortion 255
temperature measurement 255
The influence of the pressure drop on the driving force for pressure driven membrane processes, Farkova, J. 71
The Netherlands 166
Theoretical analysis of reaction zone thickness and concentration profile in non-catalytic, gas-solid reactions, A, Khan, A.R. and Bowen, J.H. 265
thermal conductivity 620
tilt 509
Time-space transformation for non-Newtonian laminar boundary layers, A, Trinh Khanh Tuoc and Keey, R.B. 604
top blowing 585
Transition to turbulent fluidization, The, Brereton, C.M.H. and Grace, J.R. 246
transportation 9
transport phenomena 585
Transport in zeolites: application to pressure and temperature swing processes, Portsmouth, R.L. and Gladden, L.F. 186
tray flow patterns 489
trays 142
Troll onshore development: balancing costs, energy efficiency and emissions, McGlashan, R.S. and Hviding, G. 3
turbulator 558
Turbulence structures, Banerjee, S. 361
turbulent fluidization 246
twisted strip 558

U
university research 166

V
vaned-wheel atomizer 385
vapour-liquid equilibria 439, 471
VASPS subsea separation and pumping system, The, Baker, A.C. and Entress, J.H. 9
Vertical caisson slugcatcher performance, Cowie, D. 25
viscosity correlation 627
Viscosity-temperature correlation for prediction of kinematic viscosity of conventional petroleum liquid, Puttagunta, V.R., Miyadonye, A. and Singh, B. 627
Visualization of phases in catalyst pellets and pellet mass transfer processes using magnetic resonance imaging, Hollewand, M.P. and Gladden, L.F. 183
vortex rings 323

W
wall-cooled packed bed 610
water drops 354
weak coupling 565
wire-wound insert 558
